

CLANMILL HOUSING, PILOT STREET BELFAST

CONTINUOUS FLIGHT AUGER

Title: Clanmill Housing, Pilot St, Belfast

Contractor: Wilson & Mawhinney

Engineer: Albert Fry

Description:

This Clanmill Housing development a few minutes walk from Belfast City Centre involved the installation of 344 CFA piles and 125 displacement piles.

The building was a 5 story apartment block adjacent to the listed St Joseph's Church. As the building was listed Quinn Piling installed our own vibration monitor for the duration of the piling works.

The piling works for the job lasted approximately 2 months in the Autumn of 2007. A full and rigorous testing regime was carried out on the installed piles as agreed with the client and engineer.
