

# DUNDRUM BUSINESS CENTRE CONTIGUOUS WALL

**Title:** Classon House,  
Dundrum Business  
Park

**Client:** John Paul Construction

**Engineer:** Byrne Looby

## Description:

This project involved the installation of an 11m long secant piled retaining wall. The secant piles were 600mm in diameter.

Antrim Yacht Club was situated adjacent to a Northern Ireland Railway line. As this site was sensitive a Quinn Piling vibration monitor was installed to monitor vibrations.

All piling work took place at night after the last train has passed on the line.
